

# TECHNICAL DATA SHEET - FANWELL

These mats are an ideal solution for large areas with frequent and constant activity. The material is extremely durable, with the largest possible resistance to creasing, available on the market today.

The material is suitable for application in both interiors and exteriors. The mat is resistant to rupture - e.g. by skates, skis etc., and is provided with a safe anti-slip surface.

There are numerous pros to using these mats, and therefore they are recommended for hospitals, shopping centres, hotel lobbies, banks, restaurants, dressing rooms, spas, fitness centres, entry paths including stairways, ski rooms, roller skating rinks, car showrooms, offices, around pools and many others..
