COLLECTION CHÂTEAU

Product structure and technical data

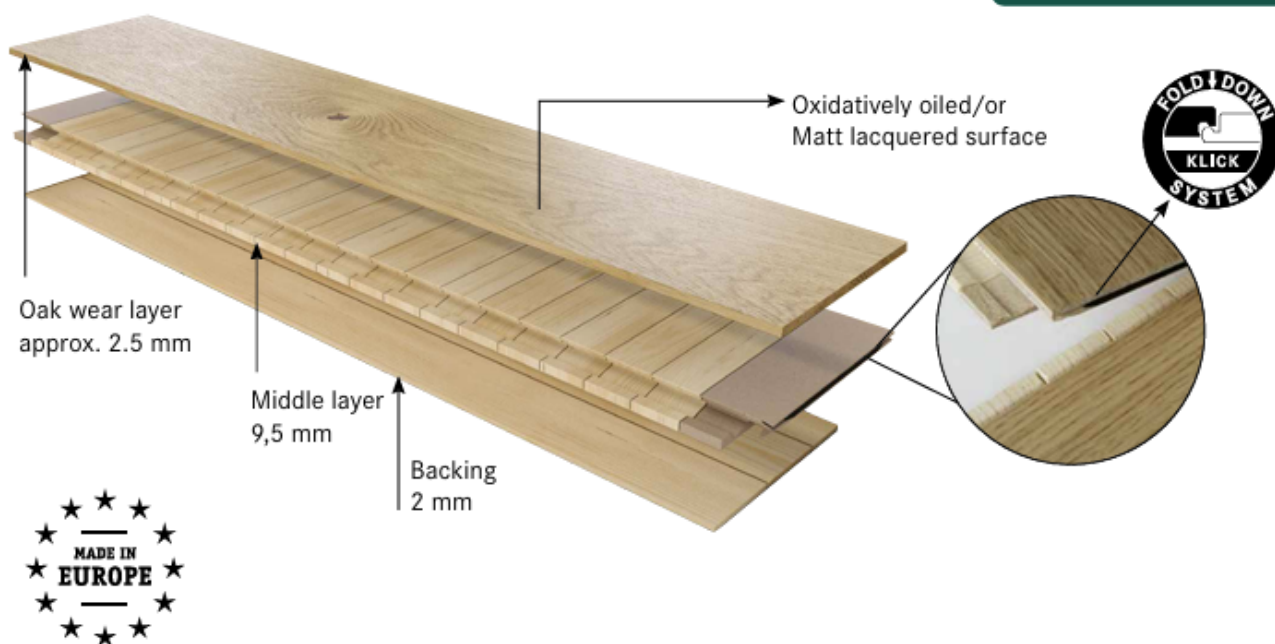

The new collection Château offers parquet in noble and classic herringbone look.

Due to the special laying of the individual elements by arranging them at a 90° angle, a distinctive pattern is created that is visually reminiscent of bones from a fish skeleton. The gradient pattern provides a unique and striking look that gives any room a timeless elegance.

The range consists of six products in two assortments. There is a choice of brushed, natural and white oiled and matt lacquered surfaces.

Thanks to the innovative face-side click connection, the herringbone parquet can also be installed as a floating floor. This makes the floor perfectly suitable for both commercial and private end users.

3-layer ready made parquet
with micro bevel on 4 sides Wood moisture 7 % (+/- 2 %)

Specification
